REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The closest prior art is exemplified by Liu et al. (US 2003/0113738A1). In the prior art method, the anti-codons of the transfer units are hybridized to the template during reaction of the reactive units and continued hybridization between the template and the transfer units must occur for the reaction to proceed. There is no teaching or suggestion in the prior art of ligating, or otherwise covalently linking, the anti-codons of the building blocks and carrying out the reaction wherein the template is separated from the anti-codons of the building blocks hybridized thereto prior to the reaction of the chemical entities of the individual building blocks.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
